

Jeremy Dutel

Freelance fullstack developer

Freelance fullstack developer passionate about computer development and new technologies, I develop custom web applications and intervene as a freelance fullstack in companies in need of resources.

Experiences

December 2021 - April 2023

Aster - Lyon

Freelance fullstack developer

Integration of Aster's technical team as a freelance fullstack developer.

Development of new features, customer support & bug fixes and refactoring.

The front end of the application is developed in Angular typescript Rxjs.

The back end of the application is developed in Node.js Sequelize.

The database is in MySQL.

We work in Agile Scrum method on sprints of 3 weeks.

We work closely with the product team to write the technical specifications in SBE (specify by example) and we develop the application on a hexagonal architecture respecting the principles of clean code, TDD, BDD, ... (all the principles of Software Craft)

September 2021 - December 2021

Savlog (Districloud) - Lyon

Project manager - Freelance front-end developer

Freelance project, development of the web front-end of an after sales service application for Savlog (Districloud).

During this project, I learned how to respond to a client's needs, adapt to all his requests and respect timelines.

I developed the whole front-end in Vue.js, which allowed me to deepen my knowledge of Vue.js and to create a very efficient web application.

April 2021 - August 2021

Aster - Lyon

Fullstack developer intern

5 months internship at Aster, a start up in the field of meetings.

My mission is to develop new features and to fix bugs reported by users.

I learned to develop in Angular typescript rxjs and Node.js sequelize, two very powerful JS frameworks.

I also learned to work in Agile Scrum, a very pleasant and efficient way of working.

September 2020 - February 2021

Cadea Solutions Aménagements - Chatillon d'Azergues

Project manager - Fullstack developer intern

Internship for 6 months at CADEA Solutions Aménagements, a company specialized in professional spaces.

I had the mission to develop a showcase website and a commercial website from A to Z with a configurator allowing to develop the activity of the company on the web.

This part time allowed me to learn how to develop a complex web application with powerful frameworks, Vue.js and Laravel.

It also allowed me to manage a large-scale project in autonomy from its initialization to its development, until its deployment and maintenance.

July 2019 - December 2019

Sopra Steria - Limonest

Fullstack developer intern

6 months internship at SopraSteria, European leader in consulting, digital services and software publishing.

My mission was to create a gamification tool for the employees of the CNAM's IT department.

I developed a web application from A to Z in order to make the work more fun for the employees of the service.

This internship allowed me to discover what the business world is really like and to learn how to develop a web application from A to Z independently.

It was a large-scale project in an IT department with 75 employees.
